

## PRECIPITATING TEST

Pic.1.

Two Drops of soap, in the two test tubes, on the left. Obviously the left tube has hard water in it and the second test tube has soft water in. With the yellow solution, the left is soft water and the right has hard water in. You can see the scale sitting at the bottom.

Pic.2.

**Below**

Soft water in the left bowl and hard water in the right bowl

**Once you have a Water Softener, you will never want to live without one ever again!**
